EcoWater Series • Central Water System

A Proven System For Reducing Sediment, Chlorine Taste and Odour

Benefits

The EcoWater Central Water System provides filtered water throughout your entire home.

During the normal operation, the water flows through several filtration processes where sediments, chlorine taste and other contaminants that adversely affect taste and odour are reduced. A clean rinse cycle is automatically initiated based on the amount of water that has been filtered, or after 14 days, which ever comes first. During this cycle, the media bed is rejuvenated, and sediments are flushed down the drain.

Specifications

Rated Capacity	695,000 gallons @ 2 ppm chlorine
.....	925,000* gallons @ 1.5 ppm chlorine
.....	1,390,000* gallons @ 1.0 ppm chlorine
.....	1,850,000* gallons @ 0.75 ppm chlorine
.....	2,780,000* gallons @ 0.5 ppm chlorine
Rated Service Flow	6GPM (22.7LPM)
Pressure Drop at 6.0 gpm	4psi (0.70kg/cm ²)
Temperature Range	40-120°F (4.4-49.9°C)
Pressure Range	30-125 PSIG (2.1-8.8kg/cm ²)

* From independent laboratory test data.

Typical residential chlorine concentration is 0.5 to 1.0 ppm.

A Proven System For Reducing Sediment, Chlorine Taste & Odour

Benefits

- Delivers great tasting, clean, filtered water to every faucet in your home!
- Water flows through several filtration processes.
- Sediment, chlorine taste and other adverse contaminants that affect taste and odor are reduced.
- Prevents sediment particles from entering your home's plumbing system, protecting your pipes and appliances.
- No filters to change!

The EcoLogical Choice:

- No salt is used, eliminating contaminant discharge.
- No plastic bottles or replacement filters in the landfill.
- Very low water usage.
- Low energy usage.
