EcoWater Series • Water Conditioner

Clean water.  
Green future.

## The Latest Technology for Water Treatment

- 1 Bypass Valve (optional)**  
Brass-free and lead-free bypass valve lets you manually bypass the system.
- 2 Patented Electronic Digital Demand Module**  
Solid-state electronics record usage patterns and control regeneration frequency based on predicted needs. Full menu-driven options.
- 3 Full One-Inch Riser**  
One-inch diameter for increased flow rates, which ensures that household demand is adequately met.
- 4 Multi-Wrap Reinforced Resin Tank**  
High Density Polyethylene (HDPE) liner with an epoxy fiberglass composite winding. Doesn't deteriorate, rust, or corrode.
- 5 Self-Cleaning Distributors**  
Distributors exhibit excellent flow rates and are cleaned automatically by counter-current water pressure.
- 6 Positive-Action Brine Valve**  
Snap-together construction eliminates use of solvents that may contaminate water. Positive action helps prevent overfilling.
- 7 Patented Stratified Resin Bed**  
Patented mix of stratified resins provides superior filtration and iron removal without sacrificing flow rate capability.
- 8 Washed Quartz Underbedding**  
Washed quartz doesn't impart hardness into softened water and allows for more powerful "piston effect" during counter-current cycles.
- 9 HydroLink™ Remote (patent pending)**  
Two-way remote technology that makes it possible to control and monitor the Series 3500 water conditioner from anywhere in the home.

**Patented Six/Eight-Cycle Valve with Easy-Clamp Ring and Patented Teflon® Discs**

**24-Volt Transformer – ENERGY STAR® qualified**

**Barium and Radium**

This softener has been tested and certified by NSF International and WQA against NSF/ANSI Standard 44 for the reduction of Barium and Radium 226/228.

### Patented Exclusive Features

- Teflon Disc Valve
- Electronics
- Design
- Remote
- Salt Level Monitor
- Stratified Resin Bed

<sup>1</sup>Intermittent flow rate does not represent the maximum service flow rate used for determining the conditioner's rated capacity and efficiency. Continuous operation at flow rates greater than the certified flow rate may affect capacity and efficiency performance. The validity of these flow rates is verified by NSF.

<sup>2</sup>Increased amounts of clear water iron can reduce conditioners efficiency. Refer to owner's manual for details. Wisconsin requires additional treatment if water supply contains greater than 5 ppm clear water iron. <sup>3</sup>When operated at 35 psi water pressure <sup>4</sup>Maximum pressure for Canadian use is 7.0 Kg/cm<sup>2</sup>
