EcoWater Series • Water Softener

Clean water.
Green future.

The Latest Technology To Improve Your Water

Bypass Valve (optional)

Brass-free and lead-free bypass valve lets you manually bypass the system.

- 1 Patented Electronic Digital Demand Module**
Solid-state electronics record usage patterns and control regeneration frequency based on predicted needs.

Time Keeper

Permanent program memory with capacity-backed time retention. Maintains time for at least 6 hours in case of power loss.

- 2 Multi-Wrap Reinforced Resin Tank**
High Density Polyethylene (HDPE) liner with an epoxy fiberglass composite winding. Doesn't deteriorate, rust, or corrode.
- 3 Self-Cleaning Distributors**
Distributors exhibit excellent flow rates and are cleaned automatically by counter-current water pressure.

- 4 Positive-Action Brine Valve**
Snap-together construction eliminates use of solvents that may contaminate water. Positive action helps prevent overfilling.

24-Volt Transformer

Simplifies installation, maintenance and reduces electrical hazards. ENERGY STAR® power supply for more efficient power use.

Automatic Bypass During Regeneration Means Continuous Water Usage
